

## **iSeries WDSc - Remote Systems Explorer**

**Duration:** One Day

**Prerequisites:** iSeries Basic Overview & PDM. Students should have a basic understanding of the iSeries operating environment and programming concepts.

**Audience:** This course is designed for programmers who are interested in using the newer GUI development tools within WDSc.

**Description:** This highly interactive lab leads you through its own exploration of IBM's RSE component of Websphere Development Studio Client (WDSc). The GUI replacement for PDM contains a wealth of useful features. Programmers taking this course can count on getting a jump start with this new and powerful tool.

### **Course Content:**

#### **iSeries RSE Component of WDSc**

- Opening the RSE perspective
- Creating a filter
- Using the LPEX Editor
- Using the Code Editor
- Verify and compile code
- Use the integrated debugger
- Run applications on the iSeries from RSE
