

WebSphere Studio Introduction

Duration: One Day

Prerequisites: None

Audience: This course is designed for beginners to Web developers.

Description: The purpose of this course is to introduce students to IBM's WebSphere Studio product. This powerful, integrated tool allows for easy Web site creation and management. Students will learn how to create simple Web pages and publish them to an iSeries server.

Course Content:

WebSphere Studio Basics:

- What is WebSphere? Why use Studio?
- Create a project, Web page
- Check in time
- Create folders on the IFS
- Publish to the iSeries

HTTP Server:

- Configure the HTTP Server
- Set Directives

Back to the Drawing Board:

- Create a second page with images, create a third page with lists
- Embed links to new pages
- Update the cascading style sheet
- Add a banner, an animated GIF
- Register your own tool

Advanced Topics:

- HTML Code
- Tables and Frames
- SQL Wizard
- Final Project
